- Participated in weekly training sessions covering React hooks, Git workflow, and agile development practices

Projects

MediSys+ – Hospital Management & Decision Support System | *React, Node.js, MongoDB*

Live

- Architected a full-stack healthcare platform serving 10+ test users with role-based access control for 3 user roles
- Implemented RESTful APIs following MVC architecture, reducing data retrieval time by 40% through optimized MongoDB queries
- Designed a real-time analytics dashboard with Chart.js visualizations tracking 5+ hospital metrics and patient records
- Built a secure authentication system with JWT tokens, processing 7+ login sessions, ensuring HIPAA-compliant security

EduPulse – AI Student Monitoring System | *Python, TensorFlow, Streamlit, R*

GitHub

- Built ML models achieving 87% accuracy in predicting student dropout risk from datasets of 10,000+ student records
- Integrated R statistical analysis (ANOVA, correlation) via rpy2, processing and visualizing 5+ performance metrics
- Created an interactive Streamlit dashboard supporting CSV uploads and batch predictions for 200+ at-risk students

Wanderlust – Full-Stack Rental Platform | *MERN Stack, Mapbox API, MongoDB Atlas*

Live

- Developed property rental platform with authentication serving 10+ test users, implementing CRUD for 25+ listings
- Integrated Mapbox Geocoding API displaying interactive maps with 100ms average load time and geolocation features
- Deployed on Render with MongoDB Atlas, managing 10+ database transactions and user review submissions

TradePilot – Stock Brokerage Platform | *React, Node.js, Express.js, MongoDB Atlas*

Live

- Built a full-stack MERN trading platform with 3 React apps (landing site, dashboard, API server), implementing RESTful endpoints for real-time portfolio management across 13+ stock holdings
- Developed an interactive trading dashboard with MUI v7 and Chart.js visualizations, featuring a Context API-driven buy/sell workflow managing 10+ WatchList instruments with zero prop-drilling
- Deployed on Render with MongoDB Atlas, configuring CORS-enabled multi-app architecture and a Jest + Testing Library suite covering critical UI components
